OTHER OBSERVATIONS/COMMENTS:
 Not discerned as a distinct context until half excavated, dimensions/limits taken from those observed in the profile well. Existence of a separate context has been implied in the notes for SU19021 (crest of plan + observations). Red layer noted in profile well at extremities to the sides of the fill.

INTERPRETATION:
 Fill of 19024, possibly to level out the floor level, possibly collapse, possibly just a dump.
 Covers over contexts 19025, 19028, and 19029, which have been interpreted as the walls and collapsed fill of a drain. So this layer may be the fill for the cut made for a drain system.
