OTHER OBSERVATIONS/COMMENTS:
 Area excavated by RPP - originally 10093 and unfinished. We decided to start a new context before excavating any of it.
 Layer was not very deep before reaching charcoal (10102).
 Layer had some very small fragments of 4. sig. - left over from RPP excavation? PROBABLY equal to 10102 under JSI stacks.

INTERPRETATION:
 Layer directly beneath tessuto placed by RPP where they removed the stacks. in 2012, probably soil trampled and contaminated by excavators' feet.
 Could be equalized with 10102 as a highly disturbed part of layer under the TSI stacks
