OTHER OBSERVATIONS/COMMENTS:

orange layer 127 (wattle and daub) covered by tile layer 126. In Northern extent, 126 is especially thin where 127 is more visible underneath. Greater concentration of tiles in NE corner. 126 does not cover extent of trench, western half more orange w/ fewer tile inclusions.

Follow in SE corner - wood inclusions w/ roof continuing into layer beneath Amphora handle continuity from 127 into 126.
