OTHER OBSERVATIONS/COMMENTS:

- easy to pick, dark brown and loose
- little materials, some ceramic and tile as you go down
- significant mixing with orange layer 17134, although upon excavation it became clearer that 17131 was in deep covering 17134

INTERPRETATION: Dark brown context with some rare pockets of orange. Upon excavation, more tiles appeared and we determined that this layer was a continuation of 17130. Significant mixing with 17128, but after excavation it was determined 17128 was covering 17134 and 17131. Possible that this was a clay deposit
