OTHER OBSERVATIONS/COMMENTS:

- upon excavation, we found tiles continuing underneath 17129. There is a line of tiles w/ some COCCIOPESTO material SW of 17129. In this context and others in our trench the magnet picks up more dirt remnants than other trenches
- dense concentration of baked daub mixed w/ tile in orange clay soil matrix

INTERPRETATION: This context included a majority of the hard and large concentrations of baked daub/clay material. Upon removal we found consistent dark orange soil, possibly associated w/production, but significantly fewer concentrations of the baked clay.
