OTHER OBSERVATIONS/COMMENTS:

- significant charcoal deposit in W corner (see plan). Whole multiple pieces found, and area is highly magnetic.
- We took 2 soil samples and a large charcoal sample
- some metal found, but otherwise little material
- we took a detail photo of the charcoal

INTERPRETATION:

This layer was underneath the heavy daub concentration, and was still significantly orange. Upon excavation we revealed significant charcoal deposits, and coupled with the high amount of soil on the magnet, we think we may be getting close to a possible civil location.
