OTHER OBSERVATIONS/COMMENTS:

- finding lots of bone, ceramic, tile, slag and metal
- Digging in the south corner, the 4th course and foundation of the wall was revealed. This will be the new context

INTERPRETATION: This is a layer underneath 17144, which we believe was a destruction/occupation layer. This layer is occupation, and is right on top of the foundations of the wall (WL).
 I see this as a potential beaten earth floor on which occupation material in 17144 was found - beaten earth floor (?) (RGR)
