OTHER OBSERVATIONS/COMMENTS:
 July 10, debris abutting 20017
 - opus quasi-reticulatum abutted by collapse material and cocciopesto surface 20048.
 - not fully excavated to foundation, but I suspect we are at final course.

INTERPRETATION:
 opus - quasi-reticulatum wall belonged to original complex; collapse material from fire about wall, as well as the cocciopesto surface (20048). Wall was rebuilt in second phase in sections in local dbl-faced technique w/ river stones (20019), but may continue under rebuilt section to equal 20067 to north. In phase w/ 20017 and 20023.
