OTHER OBSERVATIONS/COMMENTS:

- top stones cover a ledge on which tiles were placed to cover drain channel
- smooth inside → potential plastering to prevent drain erosion?
- 16 July → heavy rain flooded the trench, knocking stones off of the top of 20030 → potential contamination
- ledge ca. 10 cm down from top to hold cover tiles

INTERPRETATION:

- a S. wall, part of a drain going W-E
- appears to be in phase with Workshop complex and wall 2001P and may have been visible at surface level. Possible ground-level gutter for collecting water from structure.
- may link to drain in AR-19 TR-1
