DEPOSIT:	STRUCTURAL:	DESCRIPTION:
<ol style="list-style-type: none"> Composition (sand/silt/clay) Compaction Colour Clarity of Limits (clear/not clear/exc. lim. for N/S/W/E/depth) Dimensions Method & Conditions 	<ol style="list-style-type: none"> Type (wall, cistern, etc.) Orientation Technique (pisé, ashlar, etc.) Bonding Material # of Coursings Facing/Finish (plaster, etc.) Dimensions Related architectural features 	
CUT:		
<ol style="list-style-type: none"> Shape in Plan Top - BOS Base - BOS Sides Orientation Dimensions 		<ol style="list-style-type: none"> Brown silt w/ freq. coccia pesto fragments and a lot of calcium carbonate Easy to pick Brown w/ white & red mortar/tile fragments Clear - extends to limits of 20049 except on West side. roughly 125cm x 100cm Sunny, handpick & trowel

OTHER OBSERVATIONS/COMMENTS:
 At first it appeared we were coming down on badly preserved coccia pesto bottom surface of 20049, but soon became apparent feature continued under this level. The mortar tile-chunks did not appear at the west edge of the context. Lots of calcium carbonate inclusions. Some bone, some pottery, one half-coin.

INTERPRETATION: Fill of 20049 below collapse material & interface layer. Perhaps bits of cocciopesto lining that had fallen on top of previous fill (SU 20075) create the concentration of mortar & small tile fragments in this layer.
