OTHER OBSERVATIONS/COMMENTS:
 Similar to fill: 20083 of feature 20049, though lacked a clear layer of cocciopesta chunks (fill 20070 of 20049); some cocciopesta chunks found throughout. Pottery, bone. Less charcoal than appeared on the surface (which was interfacing with charcoal layer 20080 above). Some special finds including fibula and coin.

INTERPRETATION:

Top layer of fill of feature 20079 below collapse material. Similar soil to fill 20063 of feature 20049. More pottery and small finds than found in fill of 20049, but concentration of finds still not dense enough to constitute a proper "dump".
