Notes: - After identifying cut 17225 we began excavating the fill (here termed 17216/17220 because 17216 is mostly accumulation on top of 17220 and 17220 is fill cut 17225, but we didn't change SU until a little way into excavation.)
 - Clay lens was initially thought to be the beginning of the base but we excavated into it a little and discovered
