INTERPRETATION/DISCUSSION:
interface under plough soil over archaeological contexts. Significantly more pottery, and two small finds, found in the SW corner, which also had significantly deeper fill. Need to ascertain whether brown layer (SU 17026) in NE corner is the same deposit.
May equal 17026.

COMMENTS/OBSERVATIONS:

Uneven deposition, only a few on deep in places.
A very blk layer, freq. small black, red inclusions, med. cherty
inclusions. Similar in color to cleaning layer. Same as
17026?
