INTERPRETATION/DISCUSSION:
 • Need to understand relationship to surrounding brown matrix (17004) and to orange layer [17016].
 • Now think 17005 is two contexts, one above, one below 17016. Need to create new context for underlying white-mortar layer.
 • removed accumulation, which revealed that it is over 17016 and mortar context, which continues under 17016.

COMMENTS/OBSERVATIONS:
Cleared out S section to define limits of 17016, but now extending to north over mortar patch, which goes under 17016.
