INTERPRETATION/DISCUSSION:
 Have to determine technique → parallel wall (17002) seems to be opus retic.
 Crappy wall abutting 17120 to north; built with mortared river stone; indicates a second phase of use before fire and collapse; basino fragment abutted wall, and brick (17063) placed on top of it during post-collapse use phase.

COMMENTS/OBSERVATIONS:
 East face of wall disturbed - purposeful? or related to collapse?
 Perhaps accumulation of small stones represents fractured remains of the upper stores of the wall?
