INTERPRETATION/DISCUSSION:
 created new context [17032] because of a sloping coccio pesto on the East wall. We think this is some sort of liquid-holding tank (e.g. levigation, cistern), and this SU represents a dumping activity in tank.
 Covers wall 17019
 • Represents dumping activity in re-use phase; Freq. Dabs suggests area cleaned before re-use

COMMENTS/OBSERVATIONS:
 - Found large chunks of amphora in SE corner of this context. Some still embedded and will extend to context beneath.
 - Closing context because the floor of plaster was located in the NE corner, soil composition appears to remain the same.
 - subtle change w/ SU below, but coccio pesto facing starts to slope in
