INTERPRETATION/DISCUSSION:

Jumble of rocks between 17039. Lots of tile found. Hypothesizing that it could be a kiln based on visual similarities to placement near 17013 kiln. We stopped when we reached a darker brown, looser soil. (July 7)

- Not kiln, but collapse under 17039

(in database I switched interpretation and observation sections)

COMMENTS/OBSERVATIONS:

At first we thought **17040** was on top of **17039**. Removed **17040** July 1st → Came back to area on July 17th and found that **17040** was beneath **17039** (the edges of which were also redefined on 17 July). Now think **17040** continues below bricks **17086**.

19 July → redefined **17040** to encompass large collapse area in SE trench, and equalised with **17095**

Included charcoal area beneath **17096**
