INTERPRETATION/DISCUSSION:
 Wall left largely unexcavated so it is not possible to determine number of courings etc.
 Basins 17013 and benches 17069 sit between this wall and 17012 to the west.

COMMENTS/OBSERVATIONS:
 The wall stops approximately 12 cm from the wall of the basin. Under the first level of stones, there is a large one approximately 7cm in height. It appears (without measurement) very similar in size & composition to the large stone within [17012].
