INTERPRETATION/DISCUSSION:
Mortary foundation of column 17003. Cut (17066) into soil matrix 17051. Not as well made as mortar/stone foundation of the pier from 16000 (M22016); stones irregularly sized and place, mortary material quite friable. Did not excavate lower than this layer

COMMENTS/OBSERVATIONS:
 On surface extent appeared parallel to column base; upon excavation found the cut/fill was askew about 30° from the line of the base. Noticed when cleaning bank wall that context extends higher to the NW.
