5. Orientation		
6. Dimensions		
7. Fill N ^o s		

INTERPRETATION/DISCUSSION:

- pieces of bacino walls that had fallen on the eastern side & northwestern side of still in situ sherds 17013.

- Pieces were not burnt so use of bacino must have postdated the destruction event on the site. - Not necessarily see obserr.

COMMENTS/OBSERVATIONS:
 - Bacino appears to have been placed on charcoal stained surface abutting 17120 and collapsed onto a pebble surface (similar to 17042, but more compact/better preserved). Bricks placed over collapse and brick 17063 covers 17061, so Bacino placed in pre-collapse phase, but re-used post-collapse. (EGV)
 - did not excavate below Bacino.
