INTERPRETATION/DISCUSSION:
 Backfill from RPP. Excavated in order to find foundation of pier 10060 and understand the relationship between RPP 10000 and 17000 SC. Appears that 17093 abuts column 17003 and would have abutted 10060, linking the two areas.

COMMENTS/OBSERVATIONS:
 Trying to understand relationship between pier 10060 and SC. Foundation not previously excavated. W side of 10060 not excavated? Stratigraphy apparent on West edge of 17062.
