INTERPRETATION/DISCUSSION:

interface between occupation level 17108 and chocolate layer into which foundation of wall 17002 was made.  
 Very compact, few materials.

**COMMENTS/OBSERVATIONS:**  
 Possible "channels" cut into this layer. Curved in plan, round in section. One narrower one; one wider one with traces of wood car. 4 cm lower down. Represent void space after organic material degraded? Possible link with metal production?
