**INTERPRETATION/DISCUSSION:**  
 When <sup>we</sup> first uncovered the western edge we thought it might have been part of a burial.  
 Similar to walls in 18000. - local construction technique. Top is much lower than the tops of other walls in 17000. Was this wall already out of use by the time of the destruction of the area?  
 Some white found - remains of a chalky rock?
